Career Objective

Motivated Computer Science (AI) student aspiring to become a Software Engineer. Strong foundation in programming, machine learning, and problem-solving. Looking to contribute to real-world projects and gain industry experience.

Education

B.Tech in Computer Science (Artificial Intelligence)

Banasthali Vidyapith | 2023 – 2027

CGPA: 9.30

Technical Skills

- 1 Programming: Python, C, Java
- 2 Web Development: HTML, CSS, JavaScript (Basics)
- 3 Machine Learning: Supervised Learning, Data Preprocessing
- 4 Tools: Git, Google Colab, VS Code
- 5 Core Subjects: Data Structures, Operating Systems, DBMS

Projects

OSINT Management System

Developed a system to collect and analyze open-source intelligence data. Implemented data filtering and visualization techniques to extract meaningful insights.

Tools Used: Python, Web APIs

Aircraft Engine Predictive Maintenance (AI Project)

Built an LSTM-based model using NASA CMAPSS dataset to predict engine failures. Improved prediction accuracy using data normalization and time-series modeling.

Tools Used: Python, TensorFlow, Pandas

Internship Experience

Software Development Intern (Virtual)

Worked on developing small web applications and improving UI components. Collaborated on debugging and optimizing code performance.

Certifications

- 1 Machine Learning with Python – Coursera
- 2 Data Structures in C – NPTEL
- 3 Web Development Basics – Udemy

Achievements & Activities

- 1 Maintained CGPA of 9.30 in B.Tech
- 2 Solved 150+ coding problems on platforms like HackerRank
- 3 Participated in college-level hackathons

Languages

English, Hindi
